I.	Glossary 39	

1.0 Introduction

This document outlines procedures for recipients of state and federal grants under programs administered by the Virginia Department of Rail and Public Transportation (DRPT). These procedures govern the administration of all transit, commuter assistance programs (CAP) and planning programs/projects funded by DRPT, from the date applications are approved by the Commonwealth Transportation Board (CTB) until the projects are closed.

The procedures described in this document apply to various staff at agencies and organizations receiving funding from DRPT. Agency staff involved with grant agreements, invoicing, funding administration and tracking, capital asset inventory, financial compliance, and project/program implementation and management should read this document and follow the procedures within. The procedures in this document cover the following grant programs:

DRPT's Grant Programs:

- Transit Operating Assistance
- Transit Capital Assistance
- CAP Operating Assistance
- CAP Project Assistance
- Metropolitan Transportation Planning (FTA Section 5303)
- Demonstration Project Assistance
- Technical Assistance
- Public Transportation Intern Program
- Environmental Mitigation Trust For State Beneficiaries

Other Federal Funds Administered or Allocated By DRPT:

- Urbanized Area Formula Grants (FTA Section 5307 Governor's Apportionment)
- Formula Grants for Rural Areas (FTA Section 5311)
- Bus and Bus Facilities Program (FTA Section 5339)

Federal Aid Programs Allocated by MPOs or VDOT and Administered by DRPT

- Congestion Mitigation and Air Quality Improvement Program (CMAQ)
- Regional Surface Transportation Program (RSTP)

This document is just one of the several available resources created for grant applicants and recipients to assist with DRPT's grant application and post-award grant administration processes. Other helpful resources include DRPT's Grant Program Application Guidance document (Blue book) and DRPT's grant workshops held each year. DRPT's staff is available throughout the year to provide technical assistance and answer questions regarding specific grant programs and procedures.

2.0 Development and Approval of Six Year Improvement Program

Each spring the CTB reviews a Draft Six Year Improvement Program (SYIP) -a detailed programming document listing the proposed allocation of funding for both DRPT and Virginia Department of Transportation (VDOT) programs- and authorizes its release to the public for hearings. After considering comments received from the public, the CTB approves and adopts a Final SYIP. By law, the CTB must adopt a SYIP by June 30. DRPT develops the transit and CAP portion of the SYIP based upon applications from potential recipients for inclusion in the overall SYIP. The DRPT Director is a non-voting member of the CTB and serves as DRPT's liaison with the Secretary of Transportation and the CTB.

To learn more about the SYIP process please visit [DRPT's SYIP webpage](#).
Access the SYIP [here](#).

Key Steps

1. Application Submission: After they have reviewed DRPT's Grant Program Application Guidance, eligible funding recipients must submit applications using DRPT's [On Line Grant Administration](#) System by **11:59pm February 1 or the first business day following February 1**. Any changes to this schedule will be communicated in advance and will also be displayed in OLGA.

Note: The 5303 application for MPO funding are the only exception to this- with their submission deadline being May 1 of each year (to allow the Unified Planning Work Programs (UPWP) to be approved by the MPOs).

2. FTA Certifications and Assurances: As part of the Federal Transit Administration's (FTA) Master Agreement, applicants requesting federal assistance must comply with various federal requirements. These grant terms, conditions, and responsibilities are detailed in a single document produced each year by the FTA called the "Annual List of Certifications and Assurances". Applicants must self-certify that they are following these requirements and submit this as part of the grant application process by "pinning" FTA's certifications and assurances document in OLGA. Contracts for federal funding will not be executed unless the FTA certifications and assurances are pinned in OLGA.

Click [here](#) to access a tutorial detailing how to pin FTA's certification and assurances in OLGA.

3. DRPT Evaluates Applications: In accordance with the Grant Program Application Guidance document, DRPT reviews applications submitted by the deadline (**11:59pm February 1 or the first business day following February 1**).
4. DRPT Prepares and Presents the Draft SYIP to CTB: The Draft SYIP is typically presented to the CTB in late spring. This meeting tends to take place on the third Tuesday of April or May. There will be a notice in OLGA when the draft is released to the public. **After the draft is posted, DRPT will request that funding recipients affirm**

that local matching funds are available to meet the Draft SYIP proposed recommendations.

5. Public Hearings: The CTB holds public hearings in the spring on the Draft SYIP. DRPT will post information about the meetings on OLGA as soon as they are scheduled.
6. Amendments to the Draft SYIP: The CTB takes into consideration public comments and may direct DRPT to make amendments to the Draft SYIP. These amendments may also include edits to any line items that are not properly presented.
7. Adoption of the Program: The Final SYIP is adopted by the CTB in June. DRPT Program Managers notify recipients about the CTB action and the Final SYIP is posted on DRPT's website. If any requests for funding were included in the Draft SYIP but not included in the Final SYIP, DRPT will inform the grant applicant in writing.
8. Following CTB approval, the recipient may begin incurring expenses on the project at their own risk (see exception to this rule under [section 3.1, key step 5](#)). Funding can be reduced due to General Assembly, CTB, or federal actions. DRPT's participation in projects may alter depending on these actions. The spending for all projects must correspond with the executed contract start and end date. Any expenses incurred outside of the contract period will not be eligible for reimbursement.

3.0 Grants with Federal Funding Through Federal Highway Administration

Many of the approved transit projects and Commuter Assistance Programs (CAP) are at least partially funded with federal assistance. These federal funds generally come from the Federal Highway Administration (FHWA) or the Federal Transit Administration (FTA).

The FHWA is the source for Regional Surface Transportation Program (RSTP) and Congestion Mitigation and Air Quality (CMAQ) funds. It is DRPT's expectation that most FHWA project funding will be flexed, or transferred, to the FTA and that funds will be drawn down directly by recipients. Flex requests must be initiated by the recipient through DRPT. On an exception basis, these funds can remain with FHWA and be administered through DRPT. Both of these situations are discussed further in [section 4.0](#).

3.1 FHWA Funding - CMAQ and RSTP

CMAQ and RSTP projects must comply with all applicable Federal requirements, including those affecting determinations of eligible project costs. All Federal projects must conform to the appropriate cost principles for federal aid. Most CMAQ and RSTP projects are subject to [2 CFR Chapter II Part 200](#) -also known as "Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards". These principles focus on determining the allowable costs for the subject government entities and also provide a discussion of the relationship between appropriate costs and the purpose of the program. In addition to the aforementioned cost principals, FHWA's policy and guidance regulations for CMAQ and RSTP must also be closely adhered to. For all requests for reimbursement submitted to DRPT, a DRPT Program Manager will make the determination if an expense is eligible for reimbursement or not.

Therefore, it is incumbent upon the funding recipient to check with their DRPT Program Manager on the eligibility of an expense before expenses are incurred.

The allocation of CMAQ and RSTP funding is determined by regional Metropolitan Planning Organizations ([MPOs](#)) through the Transportation Improvement Program (TIP) planning process and **not by DRPT**. VDOT and DRPT include these funds in the SYIP and State Transportation Improvement Program (STIP). Projects are identified by a Uniform Project Code (UPC) assigned by VDOT. UPC projects that were created prior to FY14 are included in the VDOT SYIP and STIP. UPC projects that were created in FY14 and after, and assigned to DRPT by VDOT, are included in the DRPT SYIP and STIP. It is DRPT's expectation that most RSTP and CMAQ project funding will be flexed to the FTA and drawn down from the FTA directly by the approved direct recipient. On an exception basis, these funds can be administered through DRPT, and the recipient can execute a contract with DRPT, who will administer the funds through VDOT and FHWA.

Key Steps

1. MPO Programming: Regional MPOs approve the allocation of RSTP and CMAQ funds to transit projects and CAP within the region through adoption of the region's TIP. In the case of Northern Virginia, an additional entity- the Northern Virginia Transportation Authority, makes a preliminary recommendation to the National Capital Region Transportation Planning Board- the region's MPO.
2. RSTP or CMAQ Fund recipients' notification to DRPT: Recipients of RSTP or CMAQ funds should ensure these projects are included in their TIP, as well as in the STIP and SYIP to minimize delays in executing a contract. VDOT and the FTA will not approve the flex of funds unless the project and funding are in the STIP. Federal funding recipients should send an email to the DRPT Manager of Financial Programming and the DRPT Program Manager regarding their federal funding award.

Email Requirements:

- Project name
- UPC (listed in SYIP or STIP)
- Project funding source (CMAQ, RSTP, etc.)
- Fiscal year of the SYIP in which allocation was approved
- Direct recipient's request to "flex" funds to the FTA or the recipient's request to have DRPT administer the federal funds.

Note: If the recipient requests that the funds be flexed, the recipient must have completed an application in [TrAMS](#) (FTA's grant system) and provide the initial TrAMS application number which will use the funds. If the recipient requests that DRPT administer the federal funds, the recipient must provide an estimated end date of when the funds will be fully expended

The process of flexing funds or executing agreements for FHWA funds can take up to six months when TIP/STIP amendments are required. DRPT must work through VDOT, FTA, and the FHWA to flex funds or to obtain federal authorization for projects. This is why it is

vital for a recipient to ensure their projects are in the STIP and SYIP appropriately once they have received an allocation of FHWA funding from the MPO on one of their projects. The Appropriations Act requires all RSTP funds be obligated in a federal award within 12 months of being allocated by the CTB and expended within 36 months of being obligated; CMAQ funds must be obligated in a federal award within 24 months of being allocation by the CTB and expended within 48 months of being obligated.

3. DRPT Notification to VDOT to Flex FHWA Funds: After receiving approval from the FTA to flex funds, DRPT notifies the VDOT Federal Programs Division. VDOT then flexes the funds to the FTA, after receiving approval from the FHWA. After the FTA awards the federal grant, the recipient must notify DRPT's Financial Programming Manager of the approved FTA grant number, so that an agreement for the state match can be written and executed.
4. DRPT Notification to VDOT to Authorize FHWA Funds: It is DRPT's expectation that most projects will be flexed, or transferred, to the FTA and drawn down directly by recipients. On an exception basis, these funds can be administered through DRPT. When the funding recipient requests that CMAQ or RSTP funds be administered by DRPT, and DRPT approves, DRPT will work with VDOT to obtain a federal authorization number and to have the federal funds obligated. If the federal funding is appropriately included in the TIP, STIP, and SYIP, this process should take approximately one month, however, it may take longer. Funding recipients should allow for a minimum of three months for the federal authorization process and should send their request to receive funds to DRPT with that timeline in mind.
5. Preparation of Project Agreements: When VDOT gives DRPT a federal authorization number to confirm the obligation of funds, DRPT proceeds with writing a federal project agreement. Unlike the process described in [section 2.0](#), key step 8, for state funding recipients, FHWA authorized funding recipients cannot spend federal funding or state matching funds prior to the federal authorization date or beyond the end date requested. See [section 5.0](#) for details on agreement preparation and signing the agreement.

4.0 Grants with Federal Funding from Federal Transit Administration

FTA funding is identified in the [Federal Register](#). These funds may be for a specifically identified recipient, such as a FTA Section 5307: Urbanized Area Formula Grants apportionment or FTA Section 5339: Bus and Bus Facilities Program apportionment funds. They may also be awarded to DRPT in the Federal Register and allocated to recipients through the annual SYIP process.

All federally funded projects must complete appropriate NEPA and environmental screening processes, if required. The level of review needed is related to the type of action and scope. Projects may require consultation with the Federal Transit Administration and the Department of Rail and Public Transportation. Please review the attached form and contact your program manager with any questions.

FTA programs noted in section 4.0:

- FTA Section 5303: Metropolitan Transportation Planning,
- FTA Section 5307: Urbanized Area Formula Grants,
- FTA Section 5339: Bus and Bus Facilities Program, and
- FTA Section 5311: Formula Grants for Rural Areas

Urban recipients must apply for FTA funding through FTA's online grant system, [TrAMS](#).

4.1 FTA Funding – Transit provider is DIRECT Recipient

Funding from FTA programs 5303, 5310, and 5311 are always applied for by DRPT, making DRPT the direct recipient of the funds- this process is discussed in [section 4.0](#). FTA Section 5339 funds are apportioned to both DRPT and large urban recipients; DRPT applies for amounts apportioned to them, or DRPT may allocate 5339 funds to a small urban recipient. FTA program 5307 funds are always applied for directly by the recipient. This process is described below.

Key Steps

1. Notification to DRPT: Recipients are responsible for applying for state matching funds to the FTA Section 5307 or FTA Section 5339 funds during the grant application period discussed in [section 2.0](#). Recipients must ensure that the TIP accurately reflects the project and funding. DRPT will amend/adjust the STIP as necessary, based on TIP actions received from MPOs.
2. Governor's Apportionment: DRPT allocates 5307 Governor's Apportionment funds to small urban recipients based on the allocation in the Federal Register. In instances where there are multiple transit providers within one urban area DRPT requires a "split letter" from transit providers. A split letter is an agreement between transit providers in a specific small urban area on how to split the 5307 and 5339 funds allocated to their area. This letter helps further guide DRPT's allocation of 5307 funds. After the CTB approves the SYIP in June, small urban recipients should review the 5307 Governor's Apportionment allocation, and ensure their MPOs are notified, so that the TIPs can be amended or adjusted, if necessary. DRPT will make STIP amendments/adjustments based on TIP actions received from MPOs, if necessary.
3. TrAMS Application: Recipients apply for 5307, 5339, and any discretionary funds they were approved for in [TrAMS](#).
4. Notification to DRPT of Approval: After a recipient's TrAMS application is approved, the recipient must notify DRPT's Manager of Financial Programming and their DRPT Program Manager of the approval via email. The email should include the federal award number, the funding amounts, approved line items, and the information included in the approved DRPT SYIP.

5. FTA allows Pre-Award Authority that gives authority under specific and limited circumstances to incur costs for eligible project activities (before the Federal Award Date), without prejudice to possible federal participation in the cost of these project activities. Failure to follow all federal regulations can disallow these costs.
6. Preparation of Project Agreements: Upon TrAMS notification of grant approval, DRPT's Financial Programming Division will prepare a state project agreement for matching funds. See [section 5.0](#) for further details.

4.2 FTA Funding – DRPT is Recipient

DRPT is the direct recipient for some FTA program funds, which are then distributed to recipients throughout Virginia. These FTA programs include: 5303, 5307 Governors Apportionment, 5311, and 5339. DRPT is also a direct recipient for the FTA 5310 funds for rural and small urban programs. DRPT is the designated recipient for the FTA 5310 funds allocated to the Hampton Roads, Richmond, and Roanoke urbanized areas. The FTA funding awarded to DRPT is distributed to DRPT recipients through DRPT's application process using [OLGA](#). All applications are due by **11:59pm February 1 or the first business day following February 1**. The 5303 application for MPO funding is the only exception to this- with their submission deadline being May 1 of each year (to allow the Unified Planning Work Programs (UPWP) to be approved by the MPOs). Any changes to this schedule will be communicated in advance and will also be displayed in OLGA.

Key Steps

1. Governor's Apportionment: DRPT allocates 5307 Governor's Apportionment funds to small urban recipients based on the allocation in the Federal Register. In instances where there are multiple transit providers within one urban area DRPT requires a "split letter" from transit providers. A split letter is an agreement between transit providers in a specific small urban area on how to split the 5307 and 5339 funds allocated to their area. This letter helps further guide DRPT's allocation of 5307 funds. After the CTB approves the SYIP in June, small urban recipients should review the 5307 Governor's Apportionment allocation, and ensure their MPOs are notified, so that the TIPs can be amended or adjusted, if necessary. DRPT will make STIP amendments/adjustments based on TIP actions received from MPOs, if necessary.
2. DRPT Applies in TrAMS: DRPT applies in TrAMS for the 5303, 5310, 5311, and rural 5339 funding. After the TrAMS application is approved, DRPT's Financial Programming Division will prepare a federal project agreement and state project agreement for funds. See [section 5.0](#) for further details.
3. Recipient Applies in TrAMS: DRPT will write a letter to the FTA to confirm the allocation of the 5307 Governors Apportionment funds based on the approved SYIP. If DRPT's FTA 5339 funds have been allocated to a small urban transit provider, DRPT will write a letter to the FTA to confirm the allocation of the 5339 funds. In both these cases, the transit provider will apply for the federal funds directly with the FTA. The transit provider must notify DRPT's Manager of Financial Programming when the TrAMS application is

approved. The Financial Programming Division will prepare a state match agreement based on the approved FTA grant.

4. Provide Data to DRPT: Any recipient receiving FTA funding through DRPT is required to provide semiannual data to DRPT for the required submission on Disadvantaged Business Enterprises. The periods are October 1 through March 31 and April 1 through September 30 of each year, with the reports due to DRPT on April 30 and October 31, respectively. These reports provide the total contracting opportunities each recipient had throughout the six month period as well as how many of those opportunities went to Disadvantaged Business Enterprises. DRPT's Civil Rights Officer will contact you with further details.
5. Certification: Transit recipients awarded grants exceeding \$25,000, must obtain a certification from contractors awarded contracts in excess of the federal small purchase threshold stating that they are not suspended or debarred from receiving federally assisted contracts. Recipients must provide immediate written notice to DRPT for reporting to FTA if they learn that their certification or the certification of any contractors is no longer valid. 5311 Application must include the Department of Labor (DOL) [Special Warranty Arrangement Certification form](#) (formerly Section 13c). The form will be attached in the FTA Section 5311 OLGA application.

Note: The General Services Administration publishes the *List of Parties Excluded from Federal Procurement and Non Procurement Programs*. Recipients can search the list on the GSA website [here](#)

6. FTA allows Pre-Award Authority that gives authority under specific and limited circumstances to incur costs for eligible project activities (before the Federal Award Date), without prejudice to possible federal participation in the cost of these project activities. Failure to follow all federal regulations can disallow these costs.

5.0 Development and Execution of Grant Agreements

Following approval of the SYIP by the CTB, DRPT develops state project agreements for the approved **projects funded solely with state and local funds**. Recipients are authorized to proceed on expenditures for projects funded only with state and local funds as of July 1st of the SYIP year approved, before execution of the state project agreements and at their own risk. Project agreements for state matches to federal funding are written when the recipient provides an executed FTA award number to DRPT staff and funds are approved for expenditure based on the dates approved in the FTA award. If DRPT is administering the federal funds, project agreements for the federal funds and state match are written when DRPT receives an approved FHWA authorization number from VDOT or when DRPT receives an executed FTA award number from the FTA; these funds are approved for expenditure when the federal award is approved. FTA, however, does allow "pre-award" authority; this means expenditures can be made before the actual award, if "pre-award" has been specified in the application and approved by the FTA. FHWA does not allow "pre-award" authority. In all cases, the project agreements for the state matches can only be developed if all appropriate amounts are included in an approved SYIP, either VDOT's or DRPT's.

Project agreements are subordinate to master agreements, and contractually specify the details of funded projects. Grant recipients must have a signed State master agreement on file with DRPT before DRPT will issue a project agreement. Separate project agreements are executed for each project undertaken by a DRPT recipient. DRPT project agreements include a project agreement summary, the maximum state or federal share of eligible expenses, the project schedule, and the project budget which specifies the project description for which the budget may be spent. The start date of the project agreement for federal funding or state match to federal funding cannot precede the approval date of the federal authorization agreement from the FHWA, or the approval date of the FTA award (unless pre-award authority was granted). In the case of the FTA award, DRPT cannot identify a start date prior to the date the project was approved by the CTB.

Contact DRPT's Financial Programming staff for any questions about the agreements.

Key Steps

1. **DRPT Preparation of Agreements:** The grant agreements are prepared by DRPT's Financial Programming staff and submitted to the DRPT Legal Counsel for review. Agreements are then uploaded to OLGA for review and approval by the DRPT Program Manager, Division Administrator, and Finance Department. After approvals by DRPT staff, the agreement is then released to the grant recipient for execution in OLGA.
2. **Grant Recipient Review and Execution of Agreement:** When the agreement is ready for execution, the DRPT Automated Mailer system will send an email to the grant recipient notifying them that the contract is ready for approval. All grant recipient staff that will be managing, working on, incurring/authorizing expenses, and invoicing for the program/project should read the agreement. The agreement may contain approved project details, eligible expenses, line item budgets, and total budget that are different than the original application. An authorized person within the grant recipient's agency/organization approves (executes) the agreement in OLGA. The grant recipient's Master User can set up an OLGA user account for the person that is authorized to sign agreements. The agreement must be signed only by grant recipient agency personnel with the authority to sign agreements and enter their agency into a binding agreement. DRPT reserves the right to obtain a copy of written authorization stating that the person executing the agreement has the authority to do so.
3. **DRPT Execution of Agreement:** Once the agreement is executed by the grant recipient, the DRPT Director or CFO will execute the agreement. The fully executed agreement is then available in electronic format in OLGA and the project is open for reimbursement requests.
4. **Approval of FTA Certifications and Assurances:** As part of the FTA's Master Agreement, applicants requesting federal assistance must comply with various federal requirements. These grant terms, conditions, and responsibilities are detailed in a single document produced each year by the FTA called the "Annual List of Certifications and Assurances". Applicants must self-certify that they are following these requirements and submit this as part of the grant application process by "pinning" FTA's certifications and

assurances document in OLGA. Contracts for federal funding will not be executed unless the FTA certifications and assurances are pinned in OLGA.

5. **Contact Information:** Recipients must maintain the correct contact information in OLGA at all times. The information in OLGA is considered the “official” contact list for DRPT. When project agreements are ready to be pinned, the notifications will go out to the contacts listed in OLGA. If the names have not been updated, the notification may not reach those who need to know about it. If recipients are locked out of OLGA, they should contact their Agency Master User. If the Master user is locked out they should **contact Derrick Easter at derrick.easter@drpt.virginia.gov**

5.1 SMART SCALE Projects

Agreements for SMART SCALE transit projects will follow the same steps listed in [section 5.0](#). Once the project has been approved by the CTB and funding is allocated by year, DRPT will create the contract, if the funds allocated are state only.

If federal funds have been allocated, the recipient will need to complete an application with the FTA to receive the federal funds, same as the CMAQ and RSTP procedures discussed in [section 3.0](#). The federal funds will need to be flexed to the FTA, annually.

The contract will follow the process noted above in [section 5.0](#), but it will be prepared using the multiyear funding agreement format.

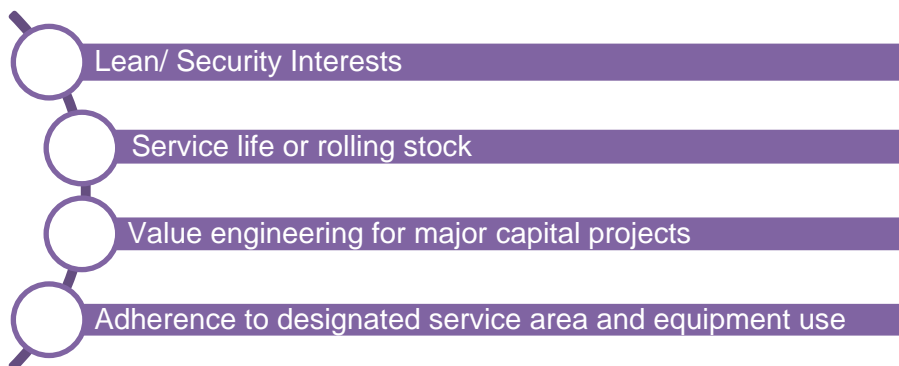

6.0 Grant Reimbursements

DRPT provides funding for approved projects on a reimbursement basis, after recipients incur expenses. Once a project agreement has been fully executed, recipients may begin submitting reimbursement requests through OLGA. The frequency of reimbursement requests should reflect the rate of expenditure on each project, but should not exceed one request a month per project. Reimbursement requests must be submitted at least quarterly, unless there have not been expenditures during the quarter.

Click [here](#) to access a tutorial detailing reimbursement request submissions in OLGA.

- CAP Operating and CAP Project Assistance grant recipients are required to submit reimbursement requests through OLGA to receive grant payments.
- State Operating grants for transit recipients are based on a payment schedule approved in the State Operating Agreements and not paid by reimbursement through OLGA. To review procedures for state operating payments, please see [Section 8.0](#).

The following is a high-level summary of what recipients must supply to DRPT when submitting a reimbursement request. Recipients must be sure to include all of the required information with their reimbursement request so that DRPT Program Managers are able to properly review the reimbursement request and consider approving for payment. Please note that expenditures must have been incurred but not necessarily paid before seeking reimbursement. Recipients must remit payment to vendors and contractors within five business days of receipt of reimbursement from DRPT. This information is expanded upon in the State Master Agreement.

Key Steps

1. When submitting a DRPT reimbursement request, the recipient must ensure the amounts submitted are appropriately supported ([see section 6.0](#)) and are for authorized activities in accordance with the Master Agreement and Project Agreement.
2. Grant recipients should verify that the expenses submitted on the reimbursement request were incurred during the designated time frame of the project.
3. The reimbursement request as well as all supporting documents pertaining to the reimbursement request, as detailed in [section 6.1](#), and those requested by DRPT Program Managers during the review process, must be uploaded to OLGA by the grant recipient.
4. **A Summary Sheet must be uploaded in OLGA with the reimbursement request.** The “Summary Sheet” is a cover page itemizing all expenses included in a reimbursement request that totals the amount requested. The “Summary Sheet” should include the following data for each expense:
 - Date of paid invoice
 - Invoice number
 - Total amount of invoice
 - Amount charged to the reimbursement request
 - Name of vendor
 - Description of the expense
 - Explanation of why reimbursement of only part of the total expense being requested, if applicable
 - Expense category
 - Total amount charged

Note: The total amount on the “Summary Sheet” must equal the total amount of the reimbursement request. Proper supporting documentation, as described in [section 6.1](#), must be uploaded in OLGA and be arranged in the identical order as listed on the “Summary Sheet.”

Example #1 Summary Sheet

(Sample for individual Vendor and/or Contractor invoices within a Reimbursement Request)

Vender Invoice Number	Vendor Name	Work Performed	Dollar Value of Work	Invoice Paid Date
			Total:	

Example #2 Summary Sheet

Invoice Date	Invoice #	Vendor	Invoice Amount	Amount Charged to Project	Description of Charge	Grant Expense Category	Notes

5. A detailed report of work performed by each agency and contractor staff person must be provided with reimbursement requests for CAP Operating, CAP Project and Technical Assistance funding. The report should detail all work performed including, meetings and webinars attended, promotional events conducted, details of assistance provided to commuters, details of assistance provided to employers, documents and advertisements created, social media activities, marketing activities, etc. A sample report of work performed is available per request from DRPT’s Program Managers.
6. Recipients of FTA 5310 funding for Mobility Management must also provide the updated mobility management work plan detailing progress toward the agency’s mobility management goals. The mobility management work plan spreadsheets must be submitted with the reimbursement request in OLGA on at least a quarterly basis following the dates listed below.
7. For 5311 Operating Assistance or any other type of reimbursement request that is supported by an excel spreadsheet, the recipient must also provide a general ledger or other financial system report that validates the amounts listed on the excel spreadsheet. If the amounts on the GL or other financial system reports do not match the amounts on the excel spreadsheet, the recipient must provide “crosswalk” documentation showing why there is a variance.

- Please do not send in cancelled checks or receipts to support all of your state transit operating expenses. DRPT Program Managers will contact you should they require support in addition to that specified above.
- For any operating assistance funded through CMAQ, however, the FHWA has much more stringent requirements for supporting documentation. Recipients of FHWA funds should be aware that expenses lacking a receipt will be ineligible for reimbursement.

Submission Due Dates:

- Data from October through December is due ➤ January
- Data from January through March is due ➤ April
- Data from April through June is due ➤ July
- Data from July through September is due ➤ October

6.1 Support Documents

All reimbursement requests must include **legible** supporting documentation that details the expenses charged to the project, that those expenses are germane to the project, shows the items produced through the project, and the work performed. Sufficient supporting documentation attached to reimbursement requests is required to provide evidence and justification for every expense. Support documents provide DRPT staff and external auditors with assurance that expenses paid are in accordance with the terms of the Master Agreement and the Project Agreement.

List of documents that should be provided with a reimbursement request:

- Printout of payroll system, or other financial system generated document showing agency staff time and benefits charges
- Detailed report of work performed by each agency staff person
- Contractor staff charges and details of work performed by each staff person
- Contractor invoices, documents and items produced
- Copies of promotional and marketing materials (e.g. print, radio, TV, online social media advertisements; flyers; posters; social media postings; email marketing; etc.)
- Copies of reports, plans, surveys, research, meeting documents, presentations, etc. produced through the project
- Legible copies of paid invoices
- Receipts
- Images of promotional items

Note: The summary list does not include every document that must be provided with a reimbursement request, as some support documentation is specific to the program or project. A detailed list of documents needed for reimbursement of travel expenses is provided in [section 6.3.](#)

Receipts and invoices must clearly state what was purchased or what the items are. Recipients may need to write a short description on the receipt or invoice to indicate what the item is, the purpose of the item, and how it was used. These notations are helpful when a DRPT Program Manager reviews the reimbursement and for auditors to understand why those expenses were incurred and charged to the project.

Supporting documentation must be from an official source such as a receipt, a third-party invoice, or from the recipient's general ledger or other financial system report. Questions about supporting documentation should be forwarded to the recipient's DRPT Program Manager prior to submission of a reimbursement request.

6.2 Indirect Costs

Some, but not all, grant programs allow indirect costs as a reimbursable expense. Grant recipients that want to charge indirect costs must first have an approved Cost Allocation Plan that includes the calculation of the indirect cost rate. The indirect cost rate calculation must be approved by either a state agency, most commonly VDOT, or federal cognizant agency. The grant recipient must provide an approval letter from one these agencies to DRPT prior to charging indirect costs to a project.

In addition, indirect costs must have been included as a line item budget category in the submitted OLGA application for funding. Check with a DRPT Program Manager if there are any questions regarding eligibility of indirect costs.

Recipients that intend to seek FTA reimbursement for indirect costs must prepare an Indirect Cost Rate Proposal (ICRP) unless a recipient chooses to use a minimum rate of 10% of the modified total cost

The following are basic requirements for an ICRP:

- ICRPs must be approved by FTA or another cognizant federal agency. Cognizance is generally assigned to the federal agency that provides the predominant amount of federal funding with a recipient
- ICRPs must be updated annually
- The updated ICRP must be retained and made available for review at the recipient's annual single audit.

For more guidance regarding indirect cost, refer to FTA circular [FTA C 5010.1E: Award Management Requirements](#).

6.3 Travel Reimbursements

DRPT will reimburse personnel traveling on official business or training directly related to the grant project for reasonable and necessary expenses incurred. The use of grant funds to

accommodate personal comfort, convenience, and taste is not permitted. Travel expenses are open to the public and must be able to withstand the test of public review. When planning and paying for travel expenses, travelers and travel planners must seek ways to reduce the cost of travel. Economy, prudence, and necessity should be of primary concern in the decision-making process.

For travel expenses related to training under the FTA Section 5311 Rural Transit Assistance Program (RTAP) and Small Urban Transit Program, see [section 10.0](#).

DRPT will only reimburse travel expenses in accordance with and up to the state and federal approved rates for lodging, mileage and per diem amounts. The Commonwealth of Virginia uses the [General Services Administration \(GSA\) rates for Lodging and Meals & Incidentals Expenses \(M&IE\)](#). GSA rates are generally published for the Federal fiscal year which runs from Oct. 1st to Sept. 30th annually. **DRPT's reimbursement rules for travel expenses apply to all state and federal funding administered by DRPT, the associated local match for those grants, and consultants performing work that is charged to grants.**

Travel Meals: Reimbursement for meals are only valid when there is approved overnight travel. Expenses for meals for same day trips are not eligible for reimbursement. Expenses for alcoholic beverages are not eligible for reimbursement. GSA's M&IE rates vary by time of year, location, whether meals were provided or not, and travel days. Rates may vary from when the travel was scheduled to the actual travel dates. Therefore, it is important to review the GSA rates and rules to ensure the correct amounts are used in the reimbursement request.

Lodging: Lodging may be reimbursed when an individual is traveling overnight on official business outside his/her work region or program/project service area. **Verify with your agency's assigned DRPT Program Manager to determine if reimbursement for overnight travel is permitted before traveling.** Lodging expenses must follow GSA's lodging guidelines and rates and be reasonable and necessary. Rates above the GSA lodging rates as well as the taxes and fees associated with the higher rates will not be reimbursed. When the lodging rate exceeds the GSA rate, taxes and fees must be prorated and the recalculation of lodging expenses must be shown in the reimbursement request. A receipt for the booking of the hotel is insufficient proof the stay took place. A receipt for actual hotel stay and payment received must be provided with the reimbursement request.

Travel Pre-Check: Before making arrangements or incurring expenses to attend conferences, workshops, training, and **anything that requires an overnight stay** grant recipients should contact their DRPT Program Manager for a "pre-check" of eligibility. The DRPT Program Manager will review whether the workshop, training or conference is related to the grant project and therefore an eligible expense; verify staff attending and the review that the planned travel days are correct and valid. The "pre-check" helps ensure that grant recipients incur expenses for travel that are appropriate and eligible for reimbursement.

Prior to arranging travel and incurring expenses, grant recipients should send their DRPT Program Manager the following information for "pre-check."

- Name, description, location and dates of the conference, workshop, training, etc.
- The names of staff that plan to attend
- The dates of overnight stays for each attendee

Note: International travel requires a travel pre-approval

Advance Payments: DRPT does not reimburse for cash advance payments to the traveler. Only the actual travel expenses will be reimbursed.

Documents Needed for Overnight Travel Reimbursements: Reimbursement requests that include travel expenses must include documentation and receipts for all travel expenses. Required documents include:

- Travel expense summary listing sheet. (This is a listing of each travel expense and includes the following: date of travel, lodging, flight, etc.; detailed purpose of travel; destination; mileage, amount of expense being charged)
- Receipt for parking
- Receipt for tolls (toll roads should not be used only for convenience; receipts include EZ-Pass printout)
- Receipt for purchased ground transportation (e.g. taxi, Lyft, Uber, airport shuttles, etc.)
- Airline ticket/boarding pass and payment receipts
- Baggage fee receipts
- Printout of public transportation fares from transit operator's planning tool or website
- Hotel stay receipt showing room rate, taxes and fees detail, and zero balance
- Receipt for registration fees
- Agendas or programs for meetings, conferences, workshops, etc.
- Travel maps showing mileage and route taken

Documents Needed for Travel for Meetings: Reimbursement requests for meetings and business travel that does not require overnight stay must include documentation that justifies and explains the purpose and location of the meeting. The [IRS mileage rate](#) should be used when a personal vehicle is used for travel. Required documents include:

- Travel expense summary listing sheet that includes:
 - Date of travel
 - Address of destination
 - Name of meeting
 - Purpose of meeting
 - Miles traveled
 - Calculated mileage expense
 - Parking, tolls, etc.
- Agendas for meetings
- Travel maps showing mileage and route taken (if tolls are being charged, the route map must show that a toll road was taken)
- Receipts for parking and tolls (toll roads should not be used only for convenience; receipts include EZ-Pass printout)

6.4 Reimbursement Request Timeline

Project Agreement Execution: Reimbursement requests can only be submitted **after** the project agreement has been fully executed by all parties.

Submission of Reimbursement Requests: Reimbursement requests must be submitted at least quarterly, and can be submitted monthly. No more than one reimbursement request may be submitted each month for each program/project. Expenses must be billed to the grant project during which the expenses were paid or incurred.

Review and Payment Timeframe: DRPT will make every effort to review and remit payment within 30 days from submission of the reimbursement request. Each reimbursement request must be approved by the DRPT Program Manager. It may take five to ten business days from the time the Program Manager approves a reimbursement request to when the grant recipient receives payment. Insufficient documentation, such as the absence of a “Summary Sheet” (see [Section 6.0](#)), missing vendor invoice copy, or other missing information can delay approvals and result in a payment exceeding 30 days.

Key Steps

1. Reimbursement Request Submission: Reimbursement requests must be submitted through OLGA. All supporting documentation (as detailed in Sections 6.0, 6.1, 6.2, and 6.3 above) must be uploaded in OLGA with the request. Supporting documentation must also include a “Summary Sheet” ([see Section 6.0](#)).
2. Reimbursement Request Review by DRPT: After a reimbursement request is submitted in OLGA, DRPT’s accounting staff will conduct a cursory review to verify if there is a Summary Sheet, supporting documentation, and that the expenses total the amount of the request. DRPT’s accounting staff will note any problems or concerns in DRPT’s internal reimbursement review system and then “release” the request to the assigned Program Manager. The DRPT Program Manager will then conduct a full review of the reimbursement request and all supporting documents.
3. Upload Additional Documents in OLGA as Needed or Requested: During the review process, the DRPT Program Manager may request additional support documents. The grant recipient can upload additional documents on the reimbursement request in OLGA.
4. Reimbursement Request – Approved: The DRPT Program Manager will approve reimbursement requests only when all required supporting documentation is attached, including an accurate “Summary Sheet” (see [Section 6.0](#)). Each expense must be eligible, must total correctly, and all applicable state and federal rules followed. Approval by the Program Manager means the request is deemed ready to be paid.
5. Reimbursement Request – Suspended: The DRPT Program Manager may “suspend” a request for reasons, such as: lack of or missing support documents, missing “Summary Sheet” ([see Section 6.0](#)), or for questions regarding one or more expenses. Suspending the request puts the reimbursement on hold until questions can be adequately answered or documentation provided. When a request is suspended, the responsible DRPT Program Manager will contact the grant recipient to explain the reason for the suspension and what action is needed. Suspending a request is a temporary status – available for no more than 30 days. If the DRPT Program Manager is satisfied with the answers and additional documents received from the grant recipient, the Program Manager will approve the request for payment. If the Program Manager is not satisfied

with the answers and documents, or if the concerns cannot be resolved within 30 days, the Program Manager will “reject” the request.

6. Reimbursement Request – Rejected: The DRPT Program Manager will “reject” a reimbursement request under the following circumstances:

- There are one or more ineligible expenses.
- There is an error in the total amount of the expenses.
- The grant recipient cannot provide sufficient support documentation.

DRPT staff cannot make changes to the amount of the request. Therefore, if there is any error in the request, the entire request must be rejected. Once a Program Manager rejects a reimbursement request, that request is completed and no further action will be made. The grant recipient designated OLGA contact will receive a notification through OLGA that the request has been rejected. The notice will include the reason for the rejection.

7. Resubmission of a Request: If the original reimbursement request was rejected, the grant recipient shall make the necessary corrections and resubmit the request. Resubmissions of prior reimbursement requests will not be counted against the one-a-month reimbursement submission rule.
8. Final Reimbursement: The final reimbursement request must be submitted in OLGA within 90 days from the project end date.
9. Reimbursement Payment: After a reimbursement request has been approved by the DRPT Program Manager, DRPT’s accounting staff will process the payment and a check or electronic payment will be generated by the Treasurer of Virginia.

7.0 Performance Data Reporting Requirements

7.1 General Requirements

The 2018 General Assembly passed House Bill 1539, which requires the Commonwealth Transportation Board (CTB) to allocate transit operating assistance solely on the basis of performance metrics.

In order to receive transit operating assistance, DRPT requires grantees to report Unlinked Passenger Trips (UPT), Vehicle Revenue Hours (VRH) and Vehicle Revenue Miles (VRM) on a monthly basis in OLGA. Additionally, grantees that report Passenger Miles Travelled (PMT) to the National Transit Database must also report annual PMT in OLGA. All performance metrics are reported by mode and are validated by DRPT Program Managers on an annual basis prior to running the operating assistance formula as identified in DRPT’s Grant Application Manual. Grantees should be prepared to answer questions about performance data submissions during their Quarterly Grantee Meetings with DRPT staff.

Required Performance Data Metrics

Metric	Description
Unlinked Passenger Trips (UPT)	Number of passengers who board public transportation vehicles, regardless of whether a passenger is transferring from another transit vehicle.

Vehicle Revenue Hours (VRH)	Hours traveled by revenue vehicles (buses, vans, railcars, etc.) while in revenue service. For uni-directional commuter routes greater than 20 miles in length, non-revenue hours associated with deadhead trips will be considered as revenue vehicle hours for the purpose of allocating operating assistance.
Vehicle Revenue Miles (VRM)	Miles traveled by revenue vehicles while in revenue service. For uni-directional commuter routes greater than 20 miles in length, non-revenue miles associated with deadhead trips will be considered as revenue vehicle miles for the purpose of allocating operating assistance.
Passenger Miles Travelled (PMT)	Cumulative sum of the distances traveled by each passenger as reported to the National Transit Database. This metric is used for calculation of the Commuter Rail Pool, and is estimated for small transit agencies based on reported ridership relative to statewide average distance traveled by commuter rail and commuter bus agency passengers.

7.2 Entering Performance Data in OLGA

Recipients of DRPT operating assistance are required to submit UPT, VRH and VRM in OLGA on or before the last business day of each month for the previous month's activity (ex: the deadline to submit July data is the last business day in August). Additionally, agencies that are required to submit annual PMT in OLGA must do so on or before December 15th each year. All performance metrics must be entered into OLGA by mode.

Backup Documentation: When submitting monthly UPT, VRH and VRM, grantees must attach copies of backup documentation that support each metric being reported. Backup documentation should, at a minimum, include daily UPT, VRH, and VRM by mode and should be submitted in a format that can be easily reconciled by DRPT staff. Summary tables generated by farebox or APC software will be accepted.

Example Monthly Performance Data Backup Table

Agency: Transit Agency B						
Month: January 2020						
	1/1/2020	1/2/2020	1/3/2020	1/4/2020		Monthly Totals
UPT						
<i>Paratransit</i>	45	40	55	50	>	1,125
<i>Fixed Route</i>	505	490	485	400	>	12,625
VRH						
<i>Paratransit</i>	20	18	25	22	>	500
<i>Fixed Route</i>	65	65	65	60	>	1,625
VRM						
<i>Paratransit</i>	70	65	85	80	>	1,750
<i>Fixed Route</i>	210	210	210	200	>	5,250

Data Variances: As grantees enter monthly UPT, VRH, and VRM, the OLGA database will query the agency's entries from the previous year and will flag any entries that have a 10% variance or greater. If a variance is identified, the grantee must describe the reason for the variance prior to data submission (ex: Transit Agency B experienced a 12% decrease in ridership in January 2020 compared to January 2019 due to a winter storm that created major service disruptions).

7.3 Amending Performance Data

Grantees may amend previously submitted performance data in OLGA if errors are discovered. When amending performance data, OLGA will require grantees to provide a reason for the change.

DRPT asks transit agencies to complete performance data amendments in OLGA no later than October 1st for the previous state fiscal year (ex: state FY20 amendments are due on October 1, 2020). Performance data amendments submitted after October 1st will not be reflected in DRPT's transit operating assistance allocations.

8.0 Public Transit Operating Assistance Payments

Payments for state transit operating assistance are made monthly, quarterly, or annually (based on a schedule approved in the agreements) to approved grant recipients, without the submission of reimbursement requests. For transit providers in the FTA Section 5311 program, recipients must submit requests for reimbursement to receive federal operating assistance. Please see [section 6.0](#) for information about reimbursements.

9.0 Project Time Extension Requests

Grant recipients may require a time extension in order to complete a project. If more time is needed to complete a project than is stated in the contract, the grant recipient must submit a project extension request in OLGA **at least 30 days prior to** the project's end date. DRPT will allow only one extension per project. The maximum allowable extension is 12 months from the original project end date. Exceptions to these rules are rare and require significantly more detail and assurances from the grant recipient and as well as more DRPT review. DRPT Program Managers will review the extension request, with a greater number of DRPT internal approvals required if any of the following are true:

- Balance remaining of \$1 million or more of state controlled funds.
- Recipient made the request after the end date of the project had passed.
- The extension request exceeds 12 months.
- The grant has already been previously extended.

Key determining factors in the approval of requests are the reasons provided by the recipient on why the project cannot be completed on time and the recipient's plan for completing the project in a timely manner. Scope of work changes will not be considered as part of a request for a time extension. Approval of a time extension is not guaranteed.

Click [here](#) to access a tutorial detailing time extension request submissions in OLGA.

Note: The end date for CAP Operating Assistance projects cannot be extended. CAP Operating Assistance projects are fiscal year grants and grant funds do not roll into the next fiscal year. Eligible recipients apply for CAP Operating Assistance each year so a new grant starts at the beginning of each fiscal year.

Key Steps

1. Submit Extension Request: An extension request must be submitted in OLGA at least 30 calendar days prior to the original end date of the grant. The request must include a detailed explanation of why an extension is needed, why the project could not be completed within the original timeline, a schedule of work with timeline to project completion, and a budget drawdown timeline.
2. DRPT Reviews Extension Request: A DRPT Program Manager will either approve or deny the request or contact the requestor for more information.
3. Notification of Decision: OLGA will notify the requestor of the decision by email. If the extension is denied, the requesting agency will have 10 business days from the date of notification to appeal the denial. Letters of appeal should be directed to DRPT's Chief of Public Transportation.

10.0 Project Budget and Scope Change Requests

A grant recipient may sometimes wish to change the scope of a project after it has been awarded or need additional funding to complete a project. These requests should be rare. Recipients of CAP Operating Assistance or CAP Project Assistance funding may also request changes to the line item budgets in their approved grant budget without change to the total approved project budget.

DRPT is legally required to seek CTB approval for all changes that are in excess of \$200,000. In order to maximize transparency and openness in DRPT's award process, however, it is vital that all projects be evaluated equally, that the SYIP be discussed in a public forum, as is legally required, and that the SYIP is approved as a whole whenever possible. Further, grants that were awarded under the MERIT project prioritization process (FY20 and later) **will be rescored prior to any modification to the approved project scope**. Scope changes that result in a project score lower than the bright line for funding in that grant year will not be approved.

In the majority of the cases where a scope change is being requested, DRPT will require that the grant recipient deobligate the fund balances from a completed line item or project and submit an application for the change requested (i.e. a new project) during the following grant cycle. If the recipient can justify why waiting until the next grant cycle is not practical (i.e. additional funds are needed to complete an on-going project or potential loss of federal funds), DRPT may consider approving the request off-cycle.

DRPT does not permit funds to be reprogrammed between different projects. The balance of funding will be deobligated and, as noted above, either the recipient will be asked to apply for the new project during the next grant cycle or an off-cycle grant will be considered. Please note that verbal authorization for moving funds is not considered valid. During any compliance review, written authorization (i.e., an approved Request to Change SYIP Allocation form) for such changes will be required.

An example of this is in a situation where grant funding was awarded for the purchase of a specific vehicle. If funds remain after the vehicle is purchased, the remaining funds may not be used toward anything outside of the approved project's scope. The remaining funds must be deobligated.

10.1 Budget and Scope Change Requests for Transit Programs

Key Steps:

1. Submit Request to Change Form: To request a minor scope change or budget increase, contact your DRPT Program Manager for a Request to Change SYIP Allocation form. The form must be signed by an authorized agent of the recipient's agency and include a detailed justification with milestones and dates for the request. Such requests must be reviewed and approved by the appropriate DRPT Program Manager, before being reviewed by DRPT Executive Team.
2. DRPT Reviews Request: DRPT will evaluate the request and communicate the decision to the requestor. If the request is approved, the grant recipient will receive new grant documentation to reflect the approved funding situation.
3. Process for Denial of Request: If the request is denied, the requestor will be encouraged to apply for the requested funding during the next grant cycle and the current funding in question will be deobligated through OLGA. If the requestor disagrees with the decision, the requestor has 10 business days from the date of notification by DRPT to appeal a denial of a budget increase request to DRPT's Chief of Public Transportation.

NOTE: Projects that include SMART SCALE funding are subject to a separate process for requesting budget or scope changes.

The SMART SCALE Project Change Guide can be found on the [SMART SCALE website](#).

10.2 Budget and Scope Change Requests for CAP Grants

Key Steps:

1. Monitor Line Item Expenses: Recipients of CAP grant funding should regularly monitor the total and line item expenses of their projects and programs to ensure they do not exceed the DRPT approved total budget and line item budgets.
2. Notify DRPT Program Manager: Contact the DRPT Program Manager when expenses for a line item are expected to exceed the DRPT approved budget for that line item. Contact the DRPT Program Manager **before** exceeding a line item budget. If the amount of the overage is small or a small percent of the line item budget (5% or less), the DRPT Program Manager may approve the budget change with an email.
3. Submit a Budget Revision Request Form: If the DRPT Program Manager determines that the line item budget change is significant enough to require a formal request, a Budget Revision Request Form will be provided to the grant recipient. The form must be completed in its entirety, including an explanation of the reason for the line item overage and an explanation of how the project or program will not be negatively impacted by reducing the budget for another line item. The net result of the budget revision cannot change the original project's total budget.

4. DRPT Reviews Request: DRPT's Program Manager will approve or deny the Budget Revision Request within 10 business days. If the extension is denied, the requesting agency will have 10 business days from the date of notification to appeal the denial. Letters of appeal should be directed to DRPT's Chief of Public Transportation.

Note: Failure to obtain pre-approval from DRPT for line item budget transfers or significantly exceeding the budget in a line item may result in denial of reimbursement of the additional expenses for that line item, even if the total budget is not exceeded.

11.0 Training Assistance

DRPT administers two training scholarships, the [FTA Section 5311 Rural Transit Assistance Program \(RTAP\)](#) and the State-funded Small Urban Transit Program.

Scholarships are available through DRPT for RTAP funds to assist rural and specialized transit operations to further the development of management skills and to encourage the development of professional networks by attending transit training, seminars, workshops and conferences.

All RTAP and Small Urban Scholarship requests must be submitted through the OLGA application process.

All approved RTAP grant scholarships will be reimbursed up to 100% of eligible expenses.

All approved Small Urban grant scholarships will be reimbursed up to 95% of eligible expenses.

11.1. Eligible Applicants

Rural Areas: Public and non-profit organizations that provide transportation services or mobility management services in non-urbanized areas of Virginia are eligible to apply. This training assistance is funded through the FTA Section 5311 program.

Small Urbanized Areas: Providers of specialized transportation or mobility management services in urbanized areas, such as FTA Section 5310 funded agencies, as well as FTA Section 5307 public transit operators in small urbanized areas, have many of the same training and technical assistance needs as transit providers in urbanized areas. DRPT permits participation by these providers, at the State's discretion, as long as the activities are primarily designed and delivered to benefit small urban transit providers. The FTA 5307 Small Urban Grant

Program is available to small urbanized areas in UZAs with a population of at least 50,000 but less than 200,000.

11.2 Eligible Program Criteria

Scholarships are available to reimburse organizations for courses, workshops, seminars, driver 'Rodeos', and conferences with subject matter applicable to rural and specialized transportation and appropriate to the level of expertise of the person(s) attending. Scholarship funds may not be used for lobbying activity, and may not be passed through to for-profit organizations under contract to FTA Section 5310 and FTA Section 5311 recipients. There is a maximum of 2 people/agency for out of state travel.

The following Small Urban providers are eligible for training assistance scholarships:

- Blacksburg Transit
- Bristol Transit
- Central Shenandoah Planning District Commission
- Charlottesville Area Transit
- Fredericksburg Area Transit
- Greater Lynchburg Transit
- Harrisonburg Transit
- Radford Transit
- Williamsburg Area Transit
- Winchester Transit

11.3 Application Procedures

Please keep in mind the following as you complete the application request:

- Maximum reimbursement rates for hotel rooms, hotel taxes, and meals are limited to rates in the effective edition of the [Federal General Services Administration \(GSA\) Travel Guidelines](#) and should be included in the training assistance application.
- Meals provided as part of the conference or training should be identified and deducted per GSA Per Diem rates.
- Air, bus, and train fares must be booked at the lowest available coach rates. Consider possible airfare increases between the time of your application submission and the time the request is approved. Estimated luggage fees should also be itemized.
- Include any registration fees in the request.
- Rental car fees are not eligible for reimbursement unless it is demonstrated that the location of the program and lodging make public transportation, shuttles, or walking inaccessible or inappropriate.
- Mileage is not reimbursable through RTAP

Once the application is approved, increases cannot be made in the request. In most cases, an agency staff member will only be approved for one out-of-state conference or training per year.

Key Steps:

1. **Application**: Applications for training assistance should be submitted in OLGA at least 30 days prior to the requested program. A request should include: the program to be attended, staff to attend, detailed description on how the program will benefit the agency and staff, an itemized list of estimated expenses, and an agenda or brochure describing the program to be attended.
2. **Application Review**: All applications will be reviewed by DRPT Program Managers for organization eligibility and program applicability. The individual submitting the application will be contacted by the DRPT Program Manager if additional information is needed and if the application is approved or denied.
3. **Invoicing**: When approved, an invoice will be created and located in OLGA under Grantee Management/ Reimbursement Requests.
4. **Reimbursements**: Reimbursement for expenses will be made to the agency, not the individual. In order to receive reimbursement, recipients should submit a detailed list of daily expenses on agency letterhead or EXCEL spreadsheet. This information should include agency Federal ID# and enclose copies of hotel bills and receipts for all other travel expenses (except meals and mileage). These support documents need to be

attachments to the request in OLGA as pdf or EXCEL. The reimbursement request should be submitted to DRPT within 30 days of completion of travel.

Note: If applicable, a certificate of completion/attendance may be required along with reimbursement documents.

5. Unspent balances: Unspent balances must be deobligated in OLGA.

12.0 Project Oversight

12.1 Quarterly Project Reviews

DRPT Program Managers will hold project review meetings at least quarterly to provide transit and CAP grant recipients with technical assistance and to ensure DRPT funded projects are proceeding according to plan. Meetings will be scheduled monthly, bi-monthly or quarterly, with at least one on-site meeting held annually.

Key Steps

1. DRPT Program Managers will schedule monthly, bi-monthly or quarterly meetings with transit and CAP grant recipients.
2. Project Updates: All DRPT funded projects will be discussed to evaluate progress towards their completion, milestone updates; problems encountered and proposed resolutions; and anticipated progress during the next quarter. The DRPT Program Manager may request a summary report, copies of invoices, proof of payment or other documents for the review. The DRPT Program Manager will record project notes and Milestone updates in OLGA on the “Oversight Report.”
3. Technical Assistance: The DRPT Program Manager may provide technical assistance as required or requested by the transit or CAP grant recipient and respond to inquiries that the recipient may have regarding projects or other programs and services offered by DRPT.
4. Other Topics: the DRPT Program Manager may review the Title VI and ADA complaints; Drug and Alcohol compliance; verify that OLGA contact information is correct; TransAM inventory; findings from the FTA or DRPT compliance reviews; review of recent accidents or safety concerns; and performance data.

12.2 Engineering Oversight

DRPT sponsored projects that involve design and/or construction activities will have some level of engineering oversight activities performed by either DRPT staff or a General Engineering Consultant (GEC) representing DRPT.

The level of engineering oversight that will be required on a project will be determined according to risk, to be identified on an individual project basis by DRPT staff. Three main categories will determine the perceived risk of a project: the funding source, the cost and complexity of a project, and the grantee experience administering similar projects. The resulting risk level that is determined, either low, moderate, or high, will dictate the engineering oversight activities DRPT may participate in throughout the project.

The table below details the three possible levels of engineering involvement in DRPT sponsored projects and the corresponding oversight activities that the grantee can expect to occur.

Oversight Level (Risk)	Minimum Oversight Activities
Low	<ul style="list-style-type: none"> ○ Provide oversight with in-house staff or use General Engineering Consultant (GEC) ○ Attend project kick-off meeting ○ Attend occasional project meetings as needed for updates, either with DRPT staff or grantee ○ Final plans, estimate, and construction schedule to be submitted to DRPT for record-keeping purposes
Moderate	<ul style="list-style-type: none"> ○ Provide oversight through a GEC or in-house staff ○ Attend project kick-off meeting ○ Attend bi-weekly or monthly project status meetings ○ Review project procurement documents (RFP package, IFB package, bid submittals, etc.) ○ Perform high level review of design phase plans, cost estimates, and schedules ○ Attend additional / other project meetings as needed ○ Attend construction kick-off meeting ○ Perform monthly or quarterly site compliance visits during construction
High	<ul style="list-style-type: none"> ○ Provide oversight through a Project Management Oversight Consultant (PMOC) or GEC ○ Attend project kick-off meeting ○ Attend weekly or bi-weekly project status meetings ○ Review project procurement documents (RFP package, IFB package, bid submittals, etc.) ○ Perform detailed review of design phase plans, cost estimates, and schedules ○ Attend construction kick-off meeting ○ Attend major milestone meetings or activities (i.e. risk register development, punch list development, substantial completion inspection, project closeout, etc.) ○ Perform site compliance and construction observation visits weekly or bi-weekly and as needed ○ Attend public meetings

Should new concerns arise or alternatively should concerns be addressed as a project advances, it is possible that the risk and corresponding level of oversight on a project may change midway through design and/or construction.

It should be anticipated that if DRPT will be reviewing project plan sets, as is an identified activity in the moderate and high oversight level categories, the grantee should incorporate a 30 day review period for stakeholders into the project schedule. DRPT will provide review

comments on the plan set in a comment-response matrix form. It will be expected that the designer will respond to review comments in the matrix response column that will then be sent back to DRPT for concurrence. The comment-response matrix is intended to be a working document and may involve an iterative review process. It should be noted that though DRPT expects the grantee will accommodate DRPT oversight activities into the project schedule, DRPT will cover the costs for the review and meeting attendance internally. DRPT's oversight activities will be paid for by DRPT and not be charged towards the grant funding already applied to a project.

12.3 Prompt Payment to DBE Subcontractors

Prompt Payment to DBE Subcontractors: DRPT monitors the prompt payment from primary contractors to their DBE subcontractors. All DBE subcontractors should be paid within 30 days of the primary consultant receiving payment from DRPT. After a program manager approves an invoice they will send the prompt payment form to the primary consultants. The primary consultant has 30 days to complete the form and verify that they have paid their DBE subcontractors. The form is also available on OLGA and will be sent directly to the contractor's billing office to complete and the subcontractor has to sign off the form signifying that payment was received in a timely fashion.

Prompt Payment by 5311 Recipients to Contractors and Subcontractors: This process is similar to DRPT's prompt payment with DBE agencies. Any 5311 agency that utilizes a contract with a DRPT transit bench consultant is subject to tracking the prompt payments. The DRPT program manager will monitor the payments associated with the project and will ensure that the selected primary contractor pays their subcontractors within 30 days of receiving their payment.

13.0 Grant Close-Out

When a project is complete the project must be officially closed-out by recipients and DRPT. This can be done in OLGA through either a final reimbursement request or a deobligation request.

Click [here](#) to access a tutorial detailing final reimbursement requests and deobligation requests in OLGA.

Key Steps

1. **Submission of Final Reimbursement Request:** The final reimbursement request must be submitted through OLGA within 90 calendar days after the final expenditure or project expiration date, whichever occurs first. The reimbursement request includes a box to be checked to indicate that it is the final reimbursement request.
2. **Notification of Expiring and Expired Grants:** DRPT's OLGA system automatically sends email notifications to alert the transit and CAP grant recipient's OLGA Master User when projects are about to expire, when the project has expired, and at the deadline for submitting a final reimbursement request. Approximately two months before the project end date an OLGA notification is sent to remind recipients of the project end date. Another notification is sent the day after the project expired alerting the recipient that the project has expired and any work performed after the project end date is not subject to

reimbursement. A third email notification is sent as a reminder that only one week remains to submit the final reimbursement request. Ninety days after the project end date, a fourth and final notification is sent, stating that the project has been closed and a deobligation request should be submitted, if needed.

3. Project Extension: DRPT's Program Managers will routinely run reports to review projects nearing their end dates. DRPT Program Managers will communicate with grant recipients on whether an extension is needed or whether the project should be closed. However, it is the grant recipient's responsibility to request an extension, if necessary, within the timeframe detailed in [Section 8.0](#).
3. Notification of Project Cancellation by Grant Recipient: If the grant recipient is cancelling a project tied to an executed grant, the recipient must deobligate the project in OLGA (see step 4 below). If the grant recipient is cancelling a project for which an agreement has never been executed, the recipient must cancel the project in OLGA under the "Cancel or Reduce Open Project" function.
4. Deobligation: **All projects must be deobligated in OLGA when the project is complete- regardless of whether there is a remaining balance or not.** To deobligate, OLGA users must submit a deobligation request in OLGA.
5. DRPT Project Close Out: DRPT closes out the project in its accounting system. No further reimbursement requests will be processed after this action.

14.0 Asset Management

14.1 Transit Vehicle Manufacturers (TVMs)

Transit Vehicle Manufacturers (TVMs) mean any manufacturer whose primary business purpose is to build vehicles specifically for mass public transportation. These vehicles can include buses, rail cars, trollies, ferries, and vehicles that serve paratransit purposes. As an FTA recipient, it is federally required that each recipient certifies that their selected TVM is compliant to the TVM DBE requirements. Recipients are required to report this information within 30 days of the notice of award.

More information on completing this required reporting can be found [here](#).

5311 Agencies

DRPT is responsible 5311 reporting to FTA, the following documents need to be sent to DRPT in a timely fashion to ensure on-time submissions: cost of vehicles, copy of the purchase order, name of the manufacturer, the total value of the contract, and the date of award (when the grantee places the order, not when the grantee receives the vehicle). DRPT must file this information with FTA within 30 days of the award date.

14.2 Capital Asset Inventory

All recipients of state capital assistance funding are required to enter asset inventory information in DRPT's online transportation asset management system, [TransAM](#). This information is used to verify asset conditions and for determining when an asset qualifies for replacement. Please note all update requirements for vehicles, facilities, and infrastructure below:

Vehicles: All revenue vehicles and non-revenue vehicles (i.e. support vehicles) must be logged in TransAM when they are put into services. Odometer readings for all vehicles must be updated twice annually on July 15 and January 15. In addition, transit agencies are encouraged to update the condition assessment of all vehicles when odometer readings are updated. All vehicles, regardless of the funding source used to acquire them, should be reported in TransAM in order to maintain a complete log of transit assets and funding needs on a statewide basis. Vehicles that are not entered in TransAM will be ineligible for prioritization under the State of Good Repair prioritization in MERIT.

Facilities and Infrastructure: All transit facilities and infrastructure must be logged in TransAM, and condition assessments must be updated annually. Please note that for all Tier II transit agencies, DRPT sponsors detailed facility condition assessments to be completed for all facilities statewide on a four year rolling schedule as part of the TAM planning process (See [Section 3.2](#)). Tier I and rural transit agencies may also opt to participate in DRPT sponsored detailed facility condition assessments as needed. A high level, abbreviated condition assessments for all facilities must be completed on an annual basis and updated in TransAM.

14.3 TAM Plan

On July 26, 2016, FTA published a [Final Rule for Transit Asset Management \(TAM\) in Federal Register Volume 81, Number 143](#). The rule requires that all transit providers receiving funding under 46 U.S.C Chapter 53 and own, operate, or manage capital assets used in the provision of public transportation create a TAM plan. Recipients must develop asset management plans for their public transportation assets, including vehicles, facilities, equipment, and other infrastructure. Requirements under the Final Rule vary based on a number of factors including agency size, type of services offered and funding source. At a minimum, all TAM Plans must include an asset inventory, condition assessments of inventoried assets, and a prioritized list of investments to improve the state of good repair of their capital assets.

The TAM rule provides different levels of requirements based on whether or not an agency is a Tier I or Tier II agency. The table below identifies the differences between the tiers.

Tier I	Tier II
Operates rail OR ≥ 101 vehicles across all fixed route modes OR ≥ 101 vehicles in one non- fixed route mode	Subrecipient of 5311 funds OR American Indian Tribe OR ≤ 100 vehicles across all fixed route modes OR ≤ 100 vehicles in one non-fixed route mode

Tier I

Agencies are required to create their own TAM plans. Tier I agencies are defined as public transportation providers that operate rail, or have 101 vehicles or more across all fixed route modes, or have 101 vehicles or more in one non-fixed route mode.

Tier II

Providers may either participate in a group plan or opt out and develop their own TAM Plan. DRPT sponsors a group plan for all interested recipients classified as a Tier II provider. A Tier II provider is defined as a sub-recipient of Formula Grants for Rural (FTA 5311) or Urbanized Areas (FTA 5307) Funds, an American Indian Tribe, a provider with 100 or less vehicles across all fixed route modes, or a provider with 100 or less vehicles in one non-fixed route mode. Tier II providers that participate in DRPT's group plan are required to regularly update and maintain their asset inventories in TransAM which must include asset condition assessments for vehicles and facilities. Parts of the plan include: measurable state-wide state of good repair goals, a decision support tool to aid in making asset investment decisions, and a list of funding priorities based on TAM targets.

Group plan participants are expected to work closely with DRPT throughout the TAM Plan creation and update process to ensure that all FTA requirements are met. This includes maintaining accurate asset inventories in TransAM so DRPT can update the Tier II Statewide TAM performance measure targets annually.

DRPT's first TAM plan was submitted to the FTA in September 2018 and an addendum was added to the plan in October, 2019. The plan must be updated every four years. The current Tier II Group plan will be fully updated by October 2022.

14.4 Disposal of Vehicles: Human Service and Rural Providers (FTA 5311)

Providers must use property for appropriate project purposes for the duration of the useful life of the property. Because DRPT is the recipient of the FTA 5311 funds, we are responsible to the federal government for the appropriate usage and disposition of this equipment. For that reason, DRPT maintains the title on all FTA 5311 vehicles for the duration of their useful life. DRPT also provides a state match for the FTA 5311 funds.

DRPT will send the title to the sub-recipient upon request after the completion of the vehicles useful life. Disposition of equipment before the end of useful life requires DRPT approval prior to the disposition; DRPT will then notify FTA. If a sub-recipient no longer needs the vehicle for the purpose for which it was acquired and requests a title for a vehicle that is not past its useful life, DRPT will seek to have the vehicle transferred to another eligible sub-recipient. The original sub-recipient will be reimbursed for local interest of the fair market value of the vehicle by the new sub-recipient. If DRPT cannot find an eligible sub-recipient for the vehicle and both DRPT and FTA approve the sale of the vehicle by the original sub-recipient, state and federal interest of the proceeds of the vehicle sale must be returned to DRPT.

After the equipment's useful life is expended with prior DRPT approval, the recipient may sell its federally assisted property for which there is no longer any public transportation purpose.

If the equipment is sold for \$5,000 or more, the recipient must notify their DRPT Program Manager who will determine whether the federal and/or state proceeds are to be used to reduce the gross project cost of other future FTA eligible capital transit awards or returned to DRPT.

The sub-recipient is expected to record the receipt of the proceeds in the recipient's accounting system, showing that the funds are restricted for use in a future capital award, and reduce the liability as the proceeds are applied to one or more FTA capital approved awards.

If the equipment is sold for less than \$5,000, the grantee still must inform DRPT. The proceeds are to be indicated in their General Ledger and noted as such. These proceeds are to be used by the transit agency, for transit purposes.

If new applications are not immediately anticipated, the recipient must inform the appropriate DRPT contact of the disposition within a reasonable amount of time. Otherwise, the subsequent capital application should contain information that the gross project cost has been reduced with proceeds from earlier capital disposition. DRPT will notify FTA as appropriate.

The sub-recipient must update the DRPT Asset Management inventory database (TransAM) by recording the disposition, final mileage, sales price, and date. The sub-recipient must also register the sale with the DMV. This can be completed online and it protects both the sub recipient and DRPT in case the vehicle purchaser does not complete the registration of the vehicle in their name.

14.5 Disposal of Vehicles: Grantee uses their own Federal Funds and DRPT Provides State Match

Providers must use property for appropriate project purposes for the duration of the useful life of the property. DRPT provides a state match to providers' federal funds and therefore has an interest in the property.

Disposition of equipment before the end of useful life requires DRPT approval prior to the disposition; If a provider no longer needs the vehicle for the purpose for which it was acquired, DRPT will seek to have the vehicle transferred to another eligible provider. The original provider will be reimbursed for local and federal interest of the fair market value of the vehicle by the new provider. If DRPT cannot find an eligible provider for the vehicle and DRPT and FTA approve the sale of the vehicle by the original provider, state and federal interest of the proceeds of the vehicle sale must be returned to DRPT and FTA, respectively.

After the equipment's useful life is expended, with prior DRPT approval, the recipient may sell its federally assisted property for which there is no longer any public transportation purpose.

If the sale of the equipment is sold for \$5,000 or more, the recipient must notify DRPT [Grant Program Manager] and DRPT will respond whether the state proceeds are to be used to reduce the gross project cost of other future FTA eligible capital transit awards or returned to DRPT. The sub recipient is expected to record the receipt of the proceeds in the recipient's accounting system, showing that the funds are restricted for use in a future capital award, and reduce the liability as the proceeds are applied to one or more FTA capital approved awards.

If the equipment is sold for less than \$5,000, the grantee still must inform DRPT. The proceeds are to be indicated in their General Ledger and noted as such. These proceeds are to be used, by the transit agency, for transit purposes.

If new applications are not immediately anticipated, the recipient must inform the appropriate DRPT contact of the disposition within a reasonable amount of time. Otherwise, the subsequent

capital application should contain information that the gross project cost has been reduced with proceeds from earlier capital disposition. DRPT will notify FTA as appropriate.

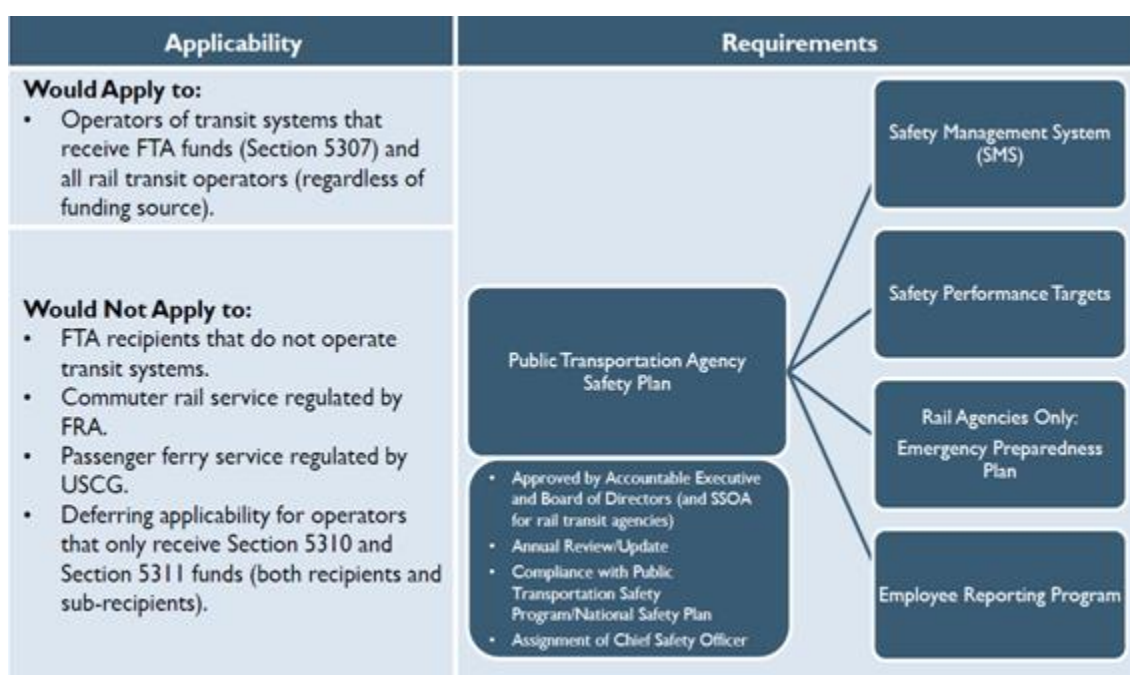

The sub recipient must update the DRPT Asset Management inventory database (TransAM) by recording the disposition, final mileage, sales price, and date. The sub recipient must also register the sale with the DMV. This can be completed online and it protects both the sub recipient and DRPT in case the vehicle purchaser does not complete the registration of the vehicle in their name.

15.0 Public Transportation Safety Plan

On July 19, 2018, [FTA published the Public Transportation Agency Safety Plan \(PTASP\) Final Rule in Federal Register Volume 83, Number 139](#). This rule requires that operators of public transportation systems receiving FTA funds must develop safety plans that include the processes and procedures necessary for implementing Safety Management Systems (SMS). This rule is intended to help transit agencies manage safety risks while prioritizing capital investments that promote safety.

The Public Transportation Agency Safety Plan (PTASP) requirement applies to all public transportation agencies receiving FTA Section 5307 funds. Agencies operating rail or agencies operating more than 100 vehicles in peak revenue service must create their own plans under the Tier I requirements. Small public transportation providers, those agencies that do not operate rail and have 100 vehicles or less in peak revenue service that fall into the Tier II requirements, and may participate in group plan.

A PTASP must include documentation and analysis of four main topic areas: safety management policy, safety risk management, safety assurance, and safety promotion. The plan must also include safety performance measures.

DRPT sponsors a group plan for all small public transportation providers in Virginia that wish to participate. **Small public transportation providers choosing to opt-out of DRPT's PTASP are required to draft and certify their own plans.** The Tier II Group PTASP plan was finalized in July 2020. Participating transit agencies are responsible for annually reviewing and updating their section of the group plan. The annual review must be completed before July 20th each year in accordance with (§673.11(a)(5)). The accountable executive and equivalent authority (board) must approve every revision to the Agency Safety Plan.

16.0 Submission of Audited Financial Statements

On an annual basis, recipients are required to submit their audited financial statements, more commonly known as a Comprehensive Annual Financial Report (CAFR) to their DRPT Program manager. CAFRs must be submitted to your DRPT Program Manager within six months of the end of the recipient's Fiscal Year End.

Key Steps

1. Recipient Submission of Audited Financial Statement: Recipients email a copy of their CAFR to their DRPT Program Manager. Audited financial statements must be submitted within 180 days after fiscal year end. If the file is larger than 5MB, please send your DRPT Program Manager a link to an entry on your website or to an FTP site. If an extension is needed, a written request should be made to the DRPT Program Manager.
2. Review by DRPT: The DRPT Audit Manager and Program Managers review the recipient's audited financial statements upon receipt. Any significant issues of concern that are revealed will be shared and discussed with the recipient.

17.0 Financial Compliance Review

On a periodic basis, DRPT conducts financial compliance reviews of recipients to provide financial technical assistance and to ensure that DRPT program requirements, as documented in Master Agreement and specific Project Agreements, are being met. Recently a review of Performance Data; Passenger Trips, Revenue, Hours, and Revenue Miles, has been added to DRPT Compliance Reviews. This was added because Performance Data measures have become a vital tool in determining Operating Assistance funding. Recipients that have had significant compliance issues in past compliance reviews will be subject to more frequent reviews. Recipients should contact the DRPT Audit Manager with any questions or concerns.

Key Steps

1. Notification of Selection: A number of recipients are selected for compliance reviews on a quarterly basis. Selected recipients are notified approximately six weeks ahead of time, informed of the documentation to have available for review, and provided the option to contact the DRPT Audit Manager or consulting firm with any questions.
2. Consultation with Program Manager: The DRPT Audit Manager consults with each selected agency's Program manager to determine whether there are any issues that should be considered during the compliance review.

3. Desk Review: The DRPT Audit Manager or consulting firm will review all supporting documentation provided by the recipient related to the reimbursement requests selected as part of the sample size of their upcoming compliance review recipient to ensure that the recipient is conducting the grant-funded projects in compliance with the applicable master agreements and project agreements.
4. On-Site Review: After the desk review is completed, the DRPT Audit Manager or consulting firm will contact the recipient with any questions they may have. They will also set up the dates for the on-site portion of the compliance review process at this time.
5. Identification of Issues: If issues are identified, the DRPT Audit Manager or consulting firm will discuss them with the recipient and offer the opportunity to provide more documentation in hopes of resolving the potential issue.
6. Documentation of Findings: Each finding is documented on a standard form, which is called an Audit Issue Fact Sheet, which summarizes the project and the issues to be addressed. Recipients sign off on the finding, indicating that the finding was discussed with them. Signing this form does not indicate that the recipient agrees with the finding. The documented findings are summarized in a compliance review report.
7. Review of Report: A Draft DRPT Compliance Review Report will be created and sent to the recipient for their review. If a corrective action plan (CAP) is required, the recipient will be required to submit the CAP to DRPT. The compliance review report is then updated by the DRPT Audit Manager to include the CAP if needed. The Compliance Review Report is then submitted to DRPT management for review.
8. Approval and Transmittal of Report: After the Chief Financial Officer signs off on the final report, the DRPT Audit Manager will send it to the recipient with the CAP included as Appendix B.

18.0 Capital Budgeting

DRPT requires all recipients receiving transit capital assistance to enter their five-year capital budget in OLGA. This information is used to determine capital funding needs for the future Six-Year Improvement Programs. The capital budget is also an important tool in the preparation of the State Transportation Improvement Plan.

The transit capital budget is due by **February 1** of each year. It must be entered in order for your capital application for that year to receive consideration for funding. Further, if DRPT does not receive a correct capital budget, the Recipient's projects may not be included in the STIP, thus increasing the time required before DRPT can go to contract on any given project.

DRPT depends on agencies to create 5-year capital budgets that are both accurate and complete, with firm projections to perform analyses and inform the statewide funding discussions.

Statewide executives depend on the accuracy of forecasting the funding needs of transit agencies. Therefore, it is important to not over-estimate. When developing a 5-year capital

budget, it is important to identify those “projects that will realistically be implemented” each year for the next five fiscal years.

DRPT reviews 5-year budgets submitted as part of the current fiscal year SYIP, and identifies whether projects will realistically be implemented in the year provided and whether the cost estimates are still accurate.

The estimated funding included in this list should be what each agency intends to apply for in each fiscal year, not the expected spending each year.

Projects that will be “realistically implemented” are those for which local funding match is expected to be available.

Note: This process should go beyond the federal guidelines of identifying projects for which funding sources are reasonably expected to be available, and identify only those that can be implemented with funding that is expected to be available and committed.

Key Steps

1. Log In to OLGA: Recipients log in to OLGA and follow the “Enter Your Capital Budget” link.
2. Enter Capital Budget: The Recipient’s current year capital application is year one, and the remaining five years of projections will be entered under the capital budget. During the current fiscal year, recipients would enter a capital application for the following fiscal year with their capital budget information covering five fiscal years.
3. Update Budget Information: The next year, the system will pre-populate the capital budget fields with the information the recipients have entered during the previous year. The recipients should update this information as needed, and enter the data for the new sixth year. In the example in 2 above, the recipient would put in an application for fiscal year 2020, update the data already entered during the previous year for 2021 – 2024, and enter data for 2025.

Appendices

I. Glossary

Acronym/Term	Definition/Explanation
ATL	Average Trip Length. The average distance ridden for an unlinked passenger trip (UPT) by time period (weekday, Saturday, Sunday) computed as passenger miles travelled (PMT) divided by unlinked passenger trips (UPT).
BRT	Bus Rapid Transit
CAP	Commuter Assistance Program
CIP	Capital Improvement Plan
CN	Construction phase
CTB	Commonwealth Transportation Board
CLRP	Constrained Long Range Transportation Plan. The MPO's adopted Transportation Plan; serves as the initial step and framework in developing a regionally based network of transportation facilities and services that meets travel needs in the most efficient and effective manner possible.
CMAQ	Congestion Mitigation and Air Quality Improvement Program. Funding to projects that contribute to meeting national air quality standards in non-attainment areas for ozone and carbon monoxide.
CR	Commuter Rail. A transit mode that is an electric or diesel propelled railway for urban passenger train service consisting of local short distance travel operating between a central city and adjacent suburbs.
DEIS	Draft Environmental Impact Statement. Federally required study that is precursor to all major transportation projects and their ability to receive federal funding. Examines potential environmental, community, and other major impacts a proposed transportation project may have.
DR	Demand Response. A transit mode comprised of passenger cars, vans or small buses operating in response to calls from passengers or their agents to the transit operator, who then dispatches a vehicle to pick up the passengers and transport them to their destinations.
EIS	Environmental Impact Statement. A National Environmental Policy Act (NEPA) document that explains the purpose and need for a project, presents project alternatives, analyzes the likely impact of each, explains the choice of a preferred alternative, and finally details measures to be taken in order to mitigate the impacts of the preferred alternative.
FEIS	Final Environmental Impact Statement. The final part of the DEIS process which reflects the extensive review and public comments of a DEIS.
FHWA	Federal Highway Administration. Division of the U.S. Department of Transportation responsible for administering federal highway transportation programs under title 23 U.S.C..
Fixed Route	A system that provide designated public transportation on which a vehicle is operated along a prescribed or planned route according to a fixed schedule
FTA	Federal Transit Administration. Federal entity responsible for transit planning and programs under title 49 U.S.C.

Heavy Rail	An electric railway system that has the capacity to handle a heavy volume of traffic, this contrasts with light rail systems, which usually handle a smaller volume
HSR	High Speed Rail
Intermodal Transportation	Refers to transport by two or more modes of transportation. For example, passenger stations which provide transfers between buses and trains are described as intermodal.
ITB	Inside the Beltway. The portion of I-66 east of I-495 (Capital Beltway). A certain portion of revenues from the tolling of this corridor will be dedicated to transit projects in this corridor
ITS	Intelligent transportation systems. An advanced application which aims to provide innovative services relating to different modes of transport and traffic management, this system enables users to more effectively use transport networks.
Light Rail	A mode of urban rail transit that encompasses tram and metro features. Operates at a higher capacity and speed than tram and typically has a designated ROW
MAJ	major expansion projects for MERIT funding
MERIT	Making Efficient and Responsible Investments in Transit- is the Virginia Department of Rail and Public Transportation's (DRPT) statewide public transportation grants program
MG	Minimum Guarantee. A funding category created in TEA-21 that guarantees a 90% return of contributions on formula funds to every state.
MIN	minor enhancement projects for MERIT funding
MOU	Memorandum of Understanding
MPO	Metropolitan Planning Organization, required in any urbanized area with a population greater than \$50,000
MSC	Metro Safety Commission. Organization that will provide federal mandated state safety oversight of WMATA on behalf of Virginia, Maryland, and D.C.
NVTC	Northern Virginia Transportation Commission. Regional governance body allocating local, state, and federal funding to transit providers in Arlington and Fairfax Counties, and the Cities of Alexandria and Falls Church. Co-owner of VRE.
OLGA	Online grant administration utilized by DRPT grantees
OTB	Outside the Beltway. The portion of I-66 west of I-495 (Capital Beltway). A certain portion of revenues from the tolling of this corridor will be dedicated to transit projects in this corridor.
OIPI	Office of Intermodal Planning and Investment. Office will cooperatively coordinate the planning and execution of the SMART SCALE program and SYIP as it relates to both DRPT and VDOT.
PE	Preliminary Engineering. Significant phase of project planning and development
PMT	Passenger Miles Travelled. The cumulative sum of the distances ridden by each passenger
RAB	Revenue Advisory Board. The 7 member panel created by HB1359 to investigate and report to the General Assembly impacts and recommendations regarding the forthcoming loss of capital bonds that fund the DRPT transit capital program.
ROW	Strictly defined, a legally and physically separated strip

	of land for exclusive use by transit vehicles; crossings may be allowed, (2) Broadly defined, any path or way on which transit vehicles travel.
RSTP	Regional Surface Transportation Program
RTAP	Rural Transit Assistance Program
SGR	State of Good Repair- MERIT
SIP	State Implementation Plan. Created for attainment maintenance of air quality standards.
SMP	Statewide Mobility Plan. VDOT's 10 year plan for adding capacity to the transportation system using the Mobility Category Funds of Federal and State Transportation funding.
SSO	State Safety Oversight. Federal law requires states provide safety oversight of rail transit agencies within their jurisdiction. In Virginia, this is limited to WMATA and HRT only
STIP	Statewide Transportation and Improvement Program. The STIP is a multi-year capital improvement program of transportation projects on and off the State Highway System, funded with revenues from the State Highway Account and other funding sources.
SYIP	Six Year Improvement Program.
TAM	Transit Asset Management- a requirement for transit providers receiving funding under 46 U.S.C Chapter 53 and own, operate, or manage capital assets used in the provision of public transportation to plan for the inventory and longevity of assets.
TEA-21	Transportation Equity Act for the 21st Century: Federal Legislation authorizing funds for all modes of transportation and guidelines on the use of those funds. This landmark legislation that clarified the role of the MPOs in the local priority setting process. TEA-21 emphasizes increased public involvement, simplicity, flexibility, fairness, and higher funding levels for transportation.
TDP	Transportation Development Plan.
TIP	Transportation Improvement Plan.
TransAM	DRPT's online transportation asset management systems. All recipients of state capital assistance funding are required to enter asset inventory information for vehicles and facilities/infrastructure.
TSDAC	Transit Service Delivery Advisory Committee. 7 member panel of transit grantees and DRPT staff tasked with technical and policy assessments of the delivery of DRPT transit capital and operating programs.
TSP	Transportation Strategic Plan
UPT	Unlinked Passenger Trips. The number of passengers who board public transportation vehicles. Passengers are counted each time they board vehicles no matter how many vehicles they use to travel from their origin to their destination.
VRH	Vehicle Revenue Hours .The hours that vehicles actually travel while in revenue service.
VRM	Vehicle Revenue Miles. The miles that vehicles actually travel while in revenue service.
VOMS	Vehicles Operated in Annual Maximum Service. The number of revenue vehicles operated to meet the annual maximum service requirement. This is the revenue vehicle count during the peak season of the year, on the week and day that maximum service is provided.
